**COMPANY PROFILE**

# ABOUT KH MODELS

## A Brief Story About The Company

Kh models is a new established company started in 2020 with accumulated experience of (15) years in the field of models manufacturing and maquette to serve various sectors in the local, Arabic and international market, as we always strive to introduce technology in the field of models to provide the best solutions that suit our customers in the Middle East and North Africa

KH Models with accumulated experience of (15) years also delivered models that were shown to presidents, princes, and some companies and government agencies in various countries and the largest real estate companies.

# COMPANY VISION

We seek to make technology available and link it to the model industry for all companies and large institutions that always strive to develop through employees and technical workers trained with the latest technical means to satisfy all customers

# COMPANY MISSION

There is a gap in the use of advanced technology and its integration with the modeling industry, and this is what we seek to do and is to bridge that gap and achieve a balance between technology and appropriate prices to spread a new culture of development in the market.

# CO-FOUNDER

The founders believe that the introduction of technology in meeting the customers' desires is one of the most important axes that implement the market in general and revive the economy in particular, and this is what we work hard on and always strive to develop through an understanding team with high experience spanning more than 10 years in the industry.

We always strive to attract trained technicians, which K H Models Textile consists of more than 15 technicians and engineers, whose experience ranges from 10 to 20 years in the field of model making in every department of the company.

The understanding and professional work team makes the implementation of the model in a short time one of the most important features that distinguishes us in response to the client's desire and our participation in the success of his project.
